

BUILT FOR K-12 SCHOOLS

Sadly, tragic events from Sandy Hook to Columbine and Oklahoma City to Tuscaloosa have taught us that it's essential to have a sufficient emergency plan in an attempt to prevent more of these nightmare scenarios from taking place.

That's why Code Blue Corporation offers a wide range of sophisticated emergency communication solutions that can bolster the safety and security of any school environment, from kindergarteners to seniors.

Whether it's a medical emergency, dangerous weather conditions or something as frightening as an active shooter, Code Blue systems are designed to provide direct contact with first responders, who then can react in a swift and effective manner.

In addition to contributing a faster reaction for safety personnel, there also are a wide range of useful applications for non-emergency services, like car problems and assisting visitors looking for information or directions.

Safety should not be the primary educational concern, whether you're a student, teacher or parent. Code Blue's comprehensive systems ensure that when class starts the focus can be on the lesson plan because a strong emergency plan is already in place.

CB 1-s
Moon Area Schools
Pittsburgh, PA

FEATURED PRODUCTS

Blue Alert® EMS (Event Management System) Blue Alert® MNS (Mass Notification System)

Blue Alert MNS (Mass Notification System) and Blue Alert EMS (Event Management System), Code Blue's suite of innovative incident response software solutions, can be applied to efficiently and effectively detect and respond when a situation occurs in a campus setting.

Blue Alert MNS can deliver alerts about potentially dangerous situations, like an active shooter or fire in a building, through multiple platforms, including public address speakers, emails, text messaging (SMS), Facebook, Twitter, Windows and Mac OS desktop alerts, digital signs and fire panels. Meanwhile, Blue Alert EMS will monitor, record and store information with an easy-to-use interface. All of these options can be easily integrated with many existing technologies and systems.

IP1500 and IP2500: These full duplex VoIP speakerphones are ideal for a wide range of indoor and outdoor areas, including hallways, classrooms, stairwells and more. The compact, lightweight designs ensure an easy installation anywhere, while the full package of unique features - SIP standards, fault monitoring, auxiliary output, outdoor rating - comes in one convenient package.

Wall Mounted 180° Public Address: A wall-mounted option for deploying emergency alerts complements existing or new mass notification systems with a powerful 180-degree, three-speaker array.
