# EMERCOMM®

Code Blue®

Product Description

EmerComm® is Code Blue's next-generation device operation system, which allows you to advance your security capabilities without sacrificing quality or durability. Its user friendly, web-based GUI (Graphical User Interface) effectively allows for the administration of connected Code Blue devices.

Available for the:

Centry® IP Video Help Point®

Standard Features

- ✔ Robust IP video and emergency phone capabilities
- ✔ Peer-to-peer audio communication
- ✔ SIP protocol support, including SIP video
- ✔ Handset and keypad functionality
- ✔ Multicast paging to broadcast to multiple end points
- ✔ Enhanced diagnostics
- ✔ Code Blue public address speaker system controls.
- ✔ Three input and three output contact closures with programmable timing capability

- ✔ Hardware controls, including Station Beacon Light flashing and ring lit button customization
- ✔ Customizable incoming call scripting
- ✔ Volume control and hang-up functionality at both the caller and operator sides
- ✔ Number and message storage
- ✔ Embedded web GUI

Benefits

- **Increased security:** Additional levels of protection at both the firmware and hardware levels
- **Advanced functionality:** Devices are managed through a single network connection
- **Intelligence to the edge:** An agnostic system of sensors and indicators give devices the capabilities of a full computer
- **System agnostic:** Easily upgrade firmware in real time as it evolves and updates
