

Here To Help

HEALTHCARE

Hospitals frequently use the phrase "Code Blue" in reference to a patient in need of immediate attention, but savvy medical personnel know that Code Blue carries a different definition – namely one of safety and security.

Minutes matter when it comes to healthcare, and Code Blue Corporation understands that it's vital to have the split-second ability to connect with employees, staff and visitors in a clear and comprehensive manner. The implementation of Code Blue systems is especially attractive to healthcare facilities looking to both improve customer service and minimize their legal considerations by offering another level of security.

Code Blue products ensure that doctors, nurses and technicians, along with anyone visiting the hospital, remain safe with proactive emergency communication solutions. That way the focus is on saving lives – and not worrying about their own.

By the Numbers

Rise in violent crime in recent years, according to International Association for Healthcare Security and Safety (IAHSS) research.

Nurses dissatisfied with the overall level of safety from workplace violence, according to the Emergency Nurses Association (ENA).

Savings hospitals have enjoyed thanks to improvements in patient safety, according to the U.S. Department of Health & Human Services.

Code Blue offers a wide range of sophisticated emergency communication solutions specifically designed to provide help at the touch of a button® for your location, and empower you to act quickly and intelligently before, during and after an incident. Here are examples of how we can help people at your location.

WHY CODE BLUE?

SITUATION	Suspicious individual	Flat tire or car trouble	Visitor lost on campus	Cardiac arrest	Test devices	Malfunctioning parking gate	Urgent announcement
SOLUTION							
FEATURE	Help Point®	Emergency Speakerphone	Help Point®	AED Housing	Systems Management	Call Box	Public Address
BENEFIT	Durable and visible contact can be made with first responders when help is needed	Clear, reliable communication when the button is pressed	Pinpoint location helps first responders know exactly how to help	Swift assistance can be provided during incidents of sudden cardiac arrest	Configure hardware and software systems on one platform	Contact closures can be used to trigger lights, open doors or integrate with access control devices	Direct communication with large campus audiences

ToolVox® X3

Provision, monitor, test and support your emergency communication devices with this hub for blue light phones and mass notification.

CB 2-a

Our popular wall-mounted enclosures are a perfect way to provide communication for parking garages, entrances and hallways.

Installation Locations

"You can't put a price on safety."

Hospital and healthcare locations continue to bolster and upgrade their safety initiatives to meet the challenges and requirements required by an ever-changing landscape.

For example, Navicent Health in Macon recently bolstered its existing security measures with \$1 million in new initiatives that included the installation of several Code Blue Help Points® and phones that will aid the 30 counties served by the second-largest hospital in the state of Georgia.

"When incidents occur, then people immediately approve (new security measures) once it's occurred, then you're kind of moving in a reactive mode and we want to get ahead of the game and try to be in a proactive mode," a Navicent Health Police Department Chief told a local TV station. "You can't put a price on safety."

CB 1-s

Code Blue is dedicated to providing a wide range of diverse emergency communication solutions that can bolster the safety and security at hospital and healthcare environments.
