

Product Description

The **IP Audio Interface (IAI)** is an IP-based audio device supporting VoIP and Audio over IP applications and an ideal solution for bridging audio and contact closures over long distance LAN/WAN networks. It extends and interfaces to non-network based traditional public address systems and allows for two-way communication with existing fire panels so they may be used as emergency end points.

Standard Features

- ✓ Can drive non-Code Blue PAS messages
- ✓ Conformal coated PCB

Technical Features

Specifications

- Height: 2.34" (5.94 cm)
- Width: 8.82" (22.40 cm)
- Depth: 10" (25.4 cm)
- Contact Closures-IN: 1
- Contact Closures-OUT: 1
- Ethernet Ports: 1
- Power: PoE
- RAM: 3MB
- Operational Temperature: -40° C to 70° C (-40° F to 158° F)

Functionality

- Line Level audio output: 600 ohm
- Self-monitoring
- Number storage
- Message storage

Mounting

- Enclosure

Note: Specifications subject to change without notice or obligation on the part of Code Blue Corporation.
