

Product Description

The **Tower Base Gasket** from Code Blue helps prevent the entry of sediment and pests in your trademarked cylindrical Help Points®. The weather-resistant rubber gasket is easily anchored inside the base of the unit and covered with polypropylene mesh that allows the power conduit to pass through, while maintaining the proper air flow to prevent condensation and overheating.

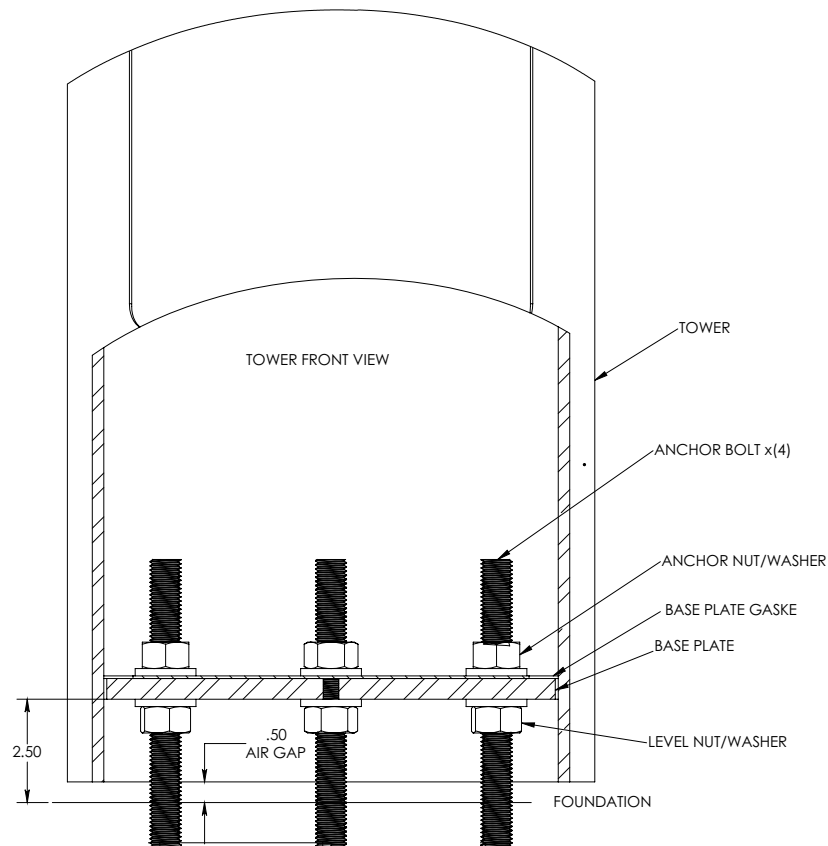

Available standard with all 1, 5 and 9 series enclosures from Code Blue, the Pedestal Base Gasket will help protect units in a wide variety of outdoor locations.

Standard Features

- ✓ Rubber construction with polypropylene mesh prevents buildup of sediment and pests
- ✓ Weather resistant

Available Options

- 1 and 9 series: 11-inch diameter, 1/16th-inch thick with four-bolt anchor pattern
- 5 series: 8-inch diameter, 1/16th-inch thick with three-bolt anchor pattern
