

## Product Description

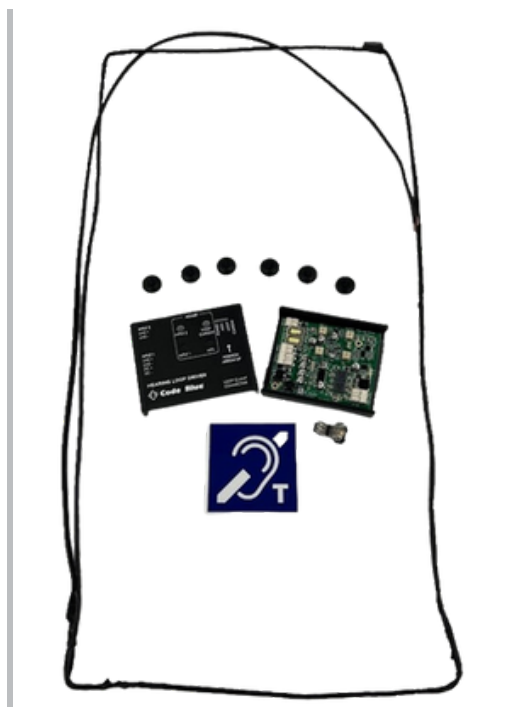

Code Blue's **Hearing Loop** kits are designed to automatically push phone call audio to a user's hearing aids. They are available for our Pedestal & Wall Mount Enclosures as well as in a remotely mounted format. They can be ordered as a component within a newly built unit or as a retrofit kit to integrate with previously installed products. The kits are designed to work with either IP or Analog speakerphones, providing an incredibly flexible installation.

## Available Kit Configurations

### Indoor/Outdoor All-In-One Panel Kit

### Pedestal Enclosure Kit

### Wall Mount Enclosure Kit

# Technical Features

## Specifications

- **Power Requirements:** 12-24VDC @ 1.5A Input 1 & 2: Wago 2060 cage clamp for 0.2-0.75mm solid core/fine stranded wire
- **Loop Output:** Wago 2061 cage clamp for 0.5-1.5mm solid core or fine stranded wire
- **Frequency Response:** 100Hz to 5kHz  $\pm 1.5$ dB relative to 1kHz at low level, measured as loop current with no metal loss correction
- **Loop Driver Dim:** 3.87" x 3.35" x 0.78"
- **Loop Driver Operating Temp:** -30 to 75 °C
- **All-In-One Panel Dim:** 8.82" x 5.43" x 0.87"
- **All-In-One Panel Operating Temp:** -30 to 75 °C
- **All-In-One Panel Rating:** IP55, IK08

## Compatibility:

### Pedestal Enclosure Kit

- CB 1 Series
- CB 5 Series
- CB 9 Series
- CB RT Series

### Wall Mount Enclosure Kit

- CB 2 Series
- CB 4 Series

### All-In-One Panel Kit

- CB6 Series
- Centry®
- IP1500/1501
- IP2500/2501

## Kit contents:

### Indoor/Outdoor All-In-One Kit

- External mount panel with built-in coil & Hearing Loop driver
- Audio Input Inline Wire Splice

### Wall Mount Enclosure Kit

- Small Hearing Loop Coil
- Hearing Loop Driver
- 6x Magnetic Cable Mounts
- Hearing Loop T-Graphic Label
- Audio Input Inline Wire Splice

### Pedestal Enclosure Kit

- Large Hearing Loop Coil
- Hearing Loop Driver
- 6x Magnetic Cable Mounts
- Hearing Loop T-Graphic Label
- Audio Input Inline Wire Splice
