

Product Description

A highly resourceful management platform for your blue light phone network, the **Blue Alert[®] Motion** software offers a secure video-verification & event-based recording solution. It also provides cloud-based storage for playback and download capabilities, built on world leading streaming and storage technologies, available via the **Blue Alert[®] Portal**.

Standard Features

Cloud-based Recording
Automatically stores all Help Point[®] initiated footages in the cloud, making it accessible from anywhere.

Notification
Be notified when the platform logs a new recording. Receive alerts on your smartphone or other devices.

Live View
Live video-verification capability allows you to view any of your Code Blue[®] devices quickly and easily.
