

Product Description

A highly resourceful management platform for your blue light phone network, the **Blue Alert[®] Motion** software offers a secure video-verification & event-based recording solution. It also provides cloud-based storage for playback (up to 90 days) and download capabilities, built on world leading streaming and storage technologies.

Standard Features

Cloud-based Recording
Automatically stores all Help Point[®] initiated footages in the cloud, making it accessible from anywhere.

Notification
Be notified when the platform logs a new recording. Receive alerts on your smartphone or other devices.

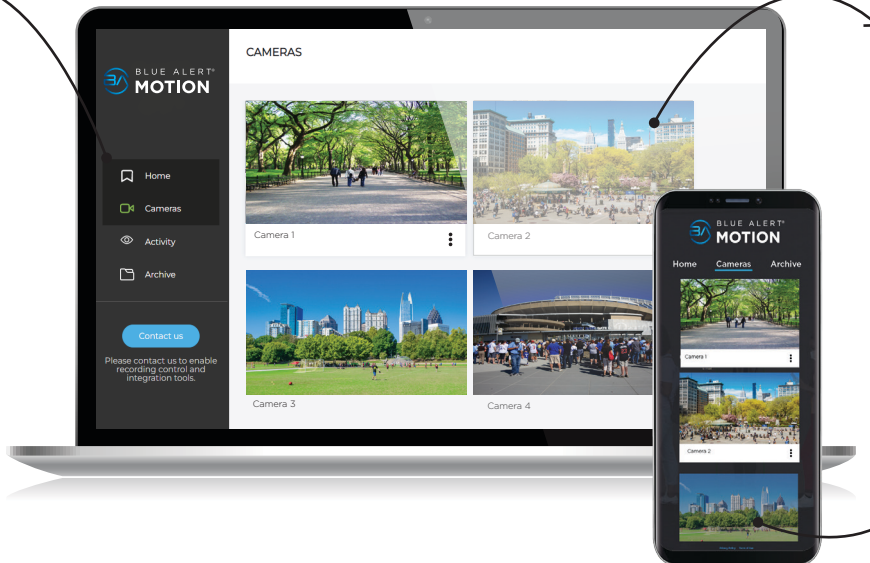

Mobile App
Get early access to your event-based video recordings from anywhere with an internet connection.

- Fully managed by Code Blue.

Consumer Cloud

- Ideal for 20+ extensions.
- Remote cloud-based network and your local network.
- Optional management by Code Blue.

The screenshot displays the Blue Alert Motion web interface. On the left is a dark sidebar with the logo and navigation options: Home, Cameras, Activity, and Archive. Below these is a 'Contact us' button and a note: 'Please contact us to enable recording control and integration tools.' The main area shows a 'Camera Identification' header above a large video feed of a university campus. Below the video is a timeline with playback controls. To the right of the video are 'EVENTS' and 'NOTES' tabs, with 'No events' displayed. In the bottom right corner, a smartphone is shown displaying the same interface, with an arrow pointing to it from the text 'View footages from your mobile device.'
