

# TOOLVOX<sup>®</sup> *v*

## Product Description

Code Blue’s award-winning emergency management platform for your blue light phone network can be deployed using a **ToolVox® XV Virtual Machine**. Eliminating the need to add a server to your current infrastructure, this option provides the ability to add the power of **Blue Alert Software**, to an existing computer or server onsite. This combination provides the ability to build a hub to effectively manage unique real-time monitoring & reporting capabilities. It also provides connections to PBX, public telephone (PSTN) and Internet (ISP) networks, in addition to third party security platforms.

## Software

 BLUE ALERT  
**CONNECT**

+

 BLUE ALERT<sup>®</sup>  
**MONITOR<sup>PRO</sup>**

Generate dial tone for IP and analog emergency phones. Support 200+ simultaneous calls.

Connect to PBX, public telephone (PSTN) and internet (ISP) networks and third-party security platforms.

Schedule and run tests of connected devices to ensure the speakers and buttons are working properly.

Remotely monitor and provision phones and public address speakers.

## Popular Upgrades

**Blue Alert® Connect Advanced Paging License:**  
Set up multicast and schedule automated paging through our Blue Alert® Connect Platform.

**FXO/FXS Gateways:**  
FXO/FXS gateways connect analog phones and PSTN trunk lines to IP networks.
