

## TOOLVOX<sup>®</sup> XV

### Product Description

Code Blue's award-winning emergency management platform for your blue light phone network can be deployed using a **ToolVox<sup>®</sup> XV Virtual Machine**. Eliminating the need to add a server to your current infrastructure, this option provides the ability to add the power of **Blue Alert Software**, to an existing computer or server on site. This combination provides the ability to build a hub to effectively manage unique real-time monitoring & reporting capabilities. It also provides connections to PBX, public telephone (PSTN) and Internet (ISP) networks, in addition to third party security platforms.

### Software

BLUE ALERT  
**CONNECT**

BLUE ALERT  
**MONITOR**

Schedule reports and run tests of connected devices to ensure the speakers, buttons and microphones are working properly at all times.

Remotely monitor Code Blue phones and third-party devices.

Generate dial tone for IP and analog emergency phones. Support 200+ simultaneous calls

Connect to PBX, public telephone (PSTN) and internet (ISP) networks and third party security platforms

### Popular Upgrades and Accessories

#### Blue Alert Connect, Advanced Paging License:

Set up multicast and scheduled automated paging through our Blue Alert<sup>®</sup> Connect Platform.

#### FXS/VoIP Gateways:

FXS gateways connect analog phones and PSTN trunk lines to IP networks.
