

Here To Help UNIVERSITIES

CB 1-s with Public Address

Code Blue Corporation has been synonymous with colleges and universities for decades. Students may know our industry-leading emergency communication solutions by a variety of names – blue light phones, emergency poles, etc. – but they also understand what their presence ultimately signifies: safety.

Unfortunately, as a multitude of headlines have taught us, schools are not immune to tragic events. Students have more than enough to think about during the semester. Why should safety be one of them? Whether it's an active shooter on campus or a medical emergency, it's vital to have an up-to-date emergency plan in place.

Fortunately, Code Blue products can bolster the security of any campus environment, while also offering useful non-emergency applications, such as responding to malfunctioning parking gates or providing visitors with information.

By the Numbers

Getting a quick fix on a location when calling from a cell phone can happen as little as 10% of the time.

Students who believe their school is very effective at keeping the campus safe.

Potential fine per Clery Act violation.

Code Blue offers a wide range of sophisticated emergency communication solutions specifically designed to provide help at the touch of a button® for your location, and empower you to act quickly and intelligently before, during and after an incident. Here are examples of how we can help people at your location.

WHY CODE BLUE?

SITUATION	Suspicious individual	Flat tire or car trouble	Visitor lost on campus	Cardiac arrest	Test devices	Malfunctioning parking gate	Urgent announcement
SOLUTION							
FEATURE	Help Point®	Emergency Speakerphone	Help Point®	AED Housing	Systems Management	Call Box	Public Address
BENEFIT	Durable and visible contact can be made with first responders when help is needed	Clear, reliable communication when the button is pressed	Pinpoint location helps first responders know exactly how to help	Swift assistance can be provided during incidents of sudden cardiac arrest	Configure hardware and software systems on one platform	Contact closures can be used to trigger lights, open doors or integrate with access control devices	Direct communication with large campus audiences
BENEFIT	Direct communication with campus security/first responders	Request assistance in a swift and reliable manner	Visible way to find and ask for help on large campuses	Access AED while simultaneously speaking with first responders	Save time and money by not performing regular visits	Drivers can request help; operators can activate gates remotely	An intelligible solution ensuring messages are both heard and understood

COMMON USES

Our products are designed to assist campus environments that incorporate buildings, open spaces and entry points, and handle shifting amounts of traffic to help keep students, faculty, employees and visitors safe, indoors and out.

Infrastructure

-  Stairwells
- Hallways
- Elevators

Entry Points

-  Dorms
- Classrooms
- Libraries

Open Spaces

-  Sidewalks
- Walking Paths
- Parking Lots

Popular PRODUCTS

CB 1-s

The 1 series sets the industry standard for emergency blue light phone towers with its wide array of features and durable quarter-inch steel construction.

Blue Alert® MNS

Deliver alerts through multiple platforms, including blue light phones, public address speakers, emails, social media and more.

IP5000

A unique mix of features - full duplex capabilities, SIP standards, self-monitoring and fault reporting - designed to meet your communication needs.

ToolVox® X3

Provision, monitor, test and support your emergency communication devices with this hub for blue light phones and mass notification.

CB 2-a

Our popular wall-mounted enclosures are a perfect way to provide communication for parking garages, entrances and hallways.

“I’ll press it if you don’t leave me alone!”

That was the vow one California State University, Chico student yelled at a suspicious man who had been following her on campus. The sophomore communications major quickly ran to a Code Blue emergency blue light phone she spotted near the recreation center. The man left when she threatened to call police.

“I was praying for a miracle the whole time,” she told the student newspaper. “I don’t even want to think about what could have happened if that phone wasn’t there.”

The phone is one of 40 located throughout campus that connects directly to the Chico Police Department when the button is activated. With nearly 4,000 new students arriving annually, and more than 17,000 students overall, Chico State is striving to ensure everyone on campus has effective access to first responders that will help keep them safe.

Installation Locations

“It’s kind of like asking, ‘How often do you use your smoke detector?’ When you really need it, you really need it. That’s the way we feel about our phones. They’re here for peace of mind for the students and the campus community.”

- Indiana State University Police Chief

Code Blue understands that student safety remains one of the top priorities for campuses around the nation. That’s why we have proudly given our support to our friends at the Clery Center and their partners at Promoting Awareness, Victim Empowerment (PAVE) during National Campus Safety Awareness Month.

Code Blue is dedicated to providing a wide range of diverse emergency communication solutions that can bolster the safety and security at college and university environments.
