Code Blue®

# Here To Help
# PARKING

CB 2-e

Parking should not be a dangerous or cumbersome process. Whether it's spotting a suspicious individual, reporting a crime or requesting non-emergency services like a malfunctioning parking gate, the variety and versatility of Code Blue Corporation systems present a commitment to safety that is unmatched in the market.

The implementation of Code Blue is especially attractive to parking facilities looking to both improve customer service and minimize their legal considerations by offering another level of security.

No one should ever have to fear the walk to their vehicle. The presence of Code Blue helps ensure that visitors feel safe from the moment they arrive at an entrance gate all the way to the most remote parking space.

That way people can feel comfortable to work, shop and play – at any time of day.

## By the Numbers

**7.3%**

Percentage of all violent crimes that occur in parking facilities, according to U.S. Bureau of Justice Statistics.

**1 in 10**

Property crimes, including theft, that occur in parking lots or garages, according to the Bureau of Justice.

**2.4 million**

Crimes that occurred in parking lots or garages between 2004-08.

Code Blue offers a wide range of sophisticated emergency communication solutions specifically designed to provide help at the touch of a button® for your location, and empower you to act quickly and intelligently before, during and after an incident. Here are examples of how we can help people at your location.

# WHY CODE BLUE?

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| **SITUATION** | **Suspicious individual** | **Flat tire or car trouble** | **Visitor lost on campus** | **Cardiac arrest** | **Test devices** | **Malfunctioning parking gate** | **Urgent announcement** |
| **SOLUTION** | Help Point® | Emergency Speakerphone | Help Point® | AED Housing | Systems Management | Call Box | Public Address |
| **FEATURE** | Durable and visible contact can be made with first responders when help is needed | Clear, reliable communication when the button is pressed | Pinpoint location helps first responders know exactly how to help | Swift assistance can be provided during incidents of sudden cardiac arrest | Configure hardware and software systems on one platform | Contact closures can be used to trigger lights, open doors or integrate with access control devices | Direct communication with large campus audiences |
| **BENEFIT** | Direct communication with campus security/first responders | Request assistance in a swift and reliable manner | Visible way to find and ask for help on large campuses | Access AED while simultaneously speaking with first responders | Save time and money by not performing regular visits | Drivers can request help; operators can activate gates remotely | An intelligible solution ensuring messages are both heard and understood |

## COMMON USES

Our products are designed to assist campus environments that incorporate buildings, open spaces and entry points, and handle shifting amounts of traffic to help keep students, travelers, employees and visitors safe, indoors and out.

### Infrastructure

Stairwells
Hallways
Elevators

### Entry Points

Entrances
Gates
Lobbies

### Open Spaces

Sidewalks
Walking Paths
Parking Lots

## Popular PRODUCTS

### CB 5-p

The heavy-duty pedestal is topped with a bright beacon/strobe that provides high visibility throughout a wide area for parking decks and other exterior uses.

### Blue Alert® MNS

Deliver alerts through multiple platforms, including blue light phones, public address speakers, emails, social media and more.

### IP5000

A unique mix of features - full duplex capabilities, SIP standards, self-monitoring and fault reporting - designed to meet your communication needs.

### ToolVox® X3

Provision, monitor, test and support your emergency communication devices with this hub for blue light phones and mass notification.

### CB 2-a

Our popular wall-mounted enclosures are a perfect way to provide communication for parking garages, entrances and hallways.

When a string of armed car jackings occurred in downtown Lafayette, Louisiana, local authorities of the southern metropolis received a little extra assistance tracking down a suspect. The University of Louisiana at Lafayette and Code Blue teamed up to lend police a hand.

A female student was approached in a university parking lot by a suspicious individual who demanded her car keys. She was able to quickly locate a Code Blue speakerphone, which she used to alert campus authorities and caused the suspect to flee. Thankfully no one was hurt, and it gave police a key break in the case.

“Her immediate reaction was to scream and at that point she was in the vicinity of one of the Code Blue light poles, so she was able to activate that pole,” Louisiana-Lafayette police sergeant Billy Abrams told a local TV station. “It brought to light information and the UL-Lafayette police department was able to conduct their investigation and obtain a warrant identifying the suspect.”
