Purpose for a Help Point[®]

More than just a call box.

Increase your Presence

Whether you aim to deter or detect suspicious/criminal activity, or you want to be present to assist your patrons, customizing your Help Points can help you provide the presence that fits your need.

Improve your Response

Whether it is an accident, fire, natural disaster, or someone in need of information or assistance, Code Blue products are designed to empower your personnel to gather information and facilitate a quick & intelligent response.

Promote your Brand

With customized colors & graphics, you can promote your brand and show your willingness to provide "Help at the touch of a button".

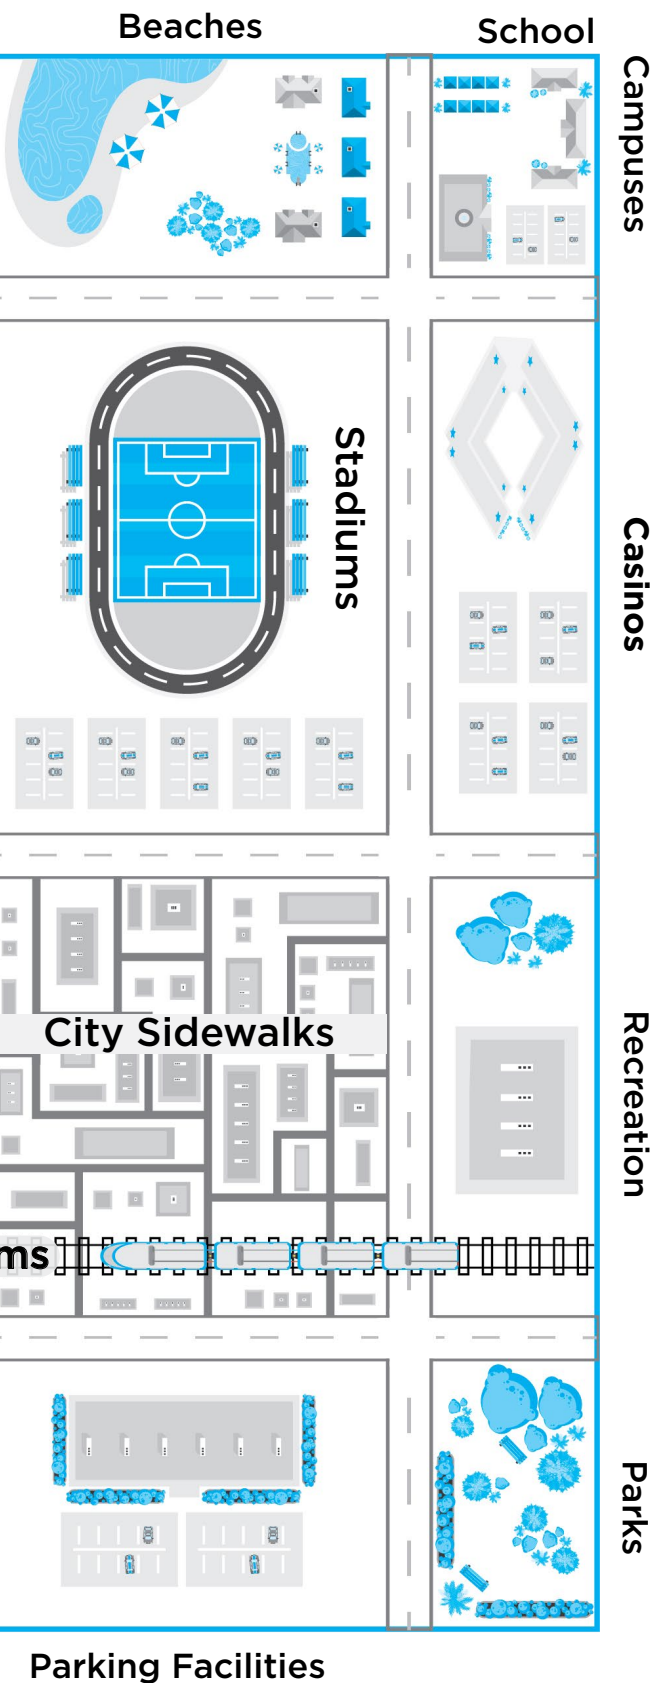

Enhance your Customer Service

Quickly and effectively resolving personal emergencies, such as a flat tire, a car that won't start, a malfunctioning gate, or issues with a ticket machine, reflects positively on your brand and customer service ratings.

Where do

you Help Point®?

Places with

- **Parking:** Lots, decks, and garages.
- **Walkways:** Concourses, sidewalks, trails, hallways, open spaces, bridges, tunnels.
- **Entrances:** Guarded or Unmanned.

Such as...

Hospitals

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage

Schools

- CB1 on sidewalks and trails
- CB4 pole-mounted or CB5s in parking lot

Transit Systems

- CB1 on platforms or at bus stops shelters
- CB2 on underground platform walls
- CB4 call boxes on platforms and in parking lots

Airports

- CB2 wall-mounted in parking garage or overpass
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage
- CB6 or Centry® in concourse and skyways

Corporations

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB4 curb-mounted or CB9 at gated entrance

Cities

- CB1 on sidewalks
- CB2 on bridges and in tunnels
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage

Beaches

- CB1 on beach, pier and/or boardwalk
- CB4 pole-mounted or CB5s in parking lot
- Centry on pavilion walls

Shopping Centers

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage
- Centry in restroom hallways and food court

Stadiums

- CB1 at stadium entrances
- CB4 pole-mounted or CB5s in parking lot
- CB6 or Centry® in perimeter concourse

Casinos

- CB4 pole-mounted or CB5s in parking lot
- CB5p in parking deck or top deck of garage

Parks & Recreation

- CB1 on trails

CONFIGURING HELP POINTS®

As simple - or as robust - as you need it to be.

1 Decide how your enclosure will be mounted and pick the enclosure model/series best suited for your location.

Free Standing Series/Models

+ CB1 CB1e, CB1s, CB1w (pg. 8)

+ CB5 CB5p, CB5s (pg. 10)

+ CB9 CB9s, CB9t (pg. 12)

+CBRT (pg. 13)

Wall or Pole-Mounted Series

+ CB2 CB2a, CB2e, CB2s (pg. 14)

+ CB4 CB4r, CB4s, CB4u (pg. 16)

+ CB6 CB6 and Speakerphones (pg. 18)

2 Select your Help Point® color and graphics.
Choose from our standard colors or we can color-match your brand colors in Pantone or RAL. (pgs. 26-27)

3 Choose a faceplate and phone.
Customize your faceplate and phone with analog or IP, additional buttons, keypads and more. (pgs. 20-21)

4 Consider power options and property voltage availability.**
Know the incoming power and voltage options at the installation site.

5 Determine your connection platform.
Network management, maintenance and monitoring options. (pg. 24-25)

From Concept to Construction

A wide variety of tools are available online to aid your design process at codeblue.com/resources.

Emergency *and* Concierge

Strengthening Security

Whether it's an accident, fire, natural disaster or something more sinister, the life-saving potential of emergency communication solutions cannot be overstated. That's why Code Blue products are designed to provide a lifeline to request help and empower you to act quickly and intelligently before, during and after an incident.

Enhancing Customer Service

A personal emergency - a car that won't start, a malfunctioning gate or ticket machine - may not be life-threatening, but it does highlight the opportunity to offer onsite assistance in situations that are not potentially dangerous and may not require traditional police or 911 personnel.

**POWER OPTIONS

NETWORK OPTIONS

CB1 SERIES

Tower Enclosures

Designed for

- Sidewalks
- Park trails
- Transit platforms

Key Features

Its **size** being the most notable feature, the iconic CB1 towers are highly visible. Their presence not only **deters crime**-related events, it offers a convenient source of emergency and/or concierge assistance to patrons.

The quarter-inch thick steel gives our cylindrical Help Points® **unmatched durability**: standing tall and ready to make the call, withstanding vehicle impacts, floods and hurricanes.

Mounting Kit Options

CB1 Foundation Anchor Kit

Template and anchor bolts.

Part # **40058**

CB1 Deck Mount Kit

Template, plates, and anchor bolts.

CB2 SERIES

Designed for

- Parking Garages
- Bridges and Tunnels

Surface Mount Enclosures

Alternative Pole Mounting Option

CB2 Pole Mount Kit

Mounting bracket with banding and fasteners.

Part # **40133**

External Solar Kit

Provide a reliable power supply that allows your unit to operate smoothly without interruption.

Available for CB2/CB4 enclosures

Key Features

The inset faceplate design allows for a faceplate light, making this model ideal for poorly lit areas.

A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted or pole-mounted, in a hallway, parking garage, deck, or lot.

Key Features

An area light feature makes the CB2-s stand out in the dark.

The faceplate light supports visibility of the speakerphone beneath the deep inset.

Best Application

Poorly lit parking lots or building entrances.

	Specifications						Power				Communication		Lighting			Options

Key Features

A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted or pole-mounted in a well-lit parking deck, garage or hallway.

Key Features

This CB2 model offers a built-in paging speaker.

A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted in a well-lit parking deck or garage where an AP system is desired.

Key Features

This CB2 model features a temperature-controlled, waterproof housing to store and power an AED.

Best Application

- AED compliance applications:
- Outside k-12 school entrances.
 - On each level of a parking garage.

CB4 SERIES

Designed for

- Hallways
- Parking Lot Poles
- Gate Entry Access

Surface Mount Enclosures

Mounting Kit Options

CB4-s and CB4-r Curb Mount Kits

Steel painted curb mount stands. Available in a single or dual for car height and/or truck height applications.

Part #	(Dual) 40777
	(Single) 41462

CB4 Pole Mount Kit

Mounting bracket with banding and fasteners.

Part #	40027
--------	--------------

Key Features

Similar in size to the surface-mount speakerphone enclosure, this model sets itself apart with the addition of a low-profile **canopy hood**.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

Key Features

This CB4-r model adds height to the hood for the addition of **faceplate light**. You can also customize the additional **front face graphic**.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

	Specifications						Power					Communication		Lighting			Options		
	Height (in.)	Width (in.)	Depth (in.)	Material	Thickness (in.)	Weight (lbs.)	Voltages (AC)	Hard Wire	NightCharge®	PoE	Solar	Hard Wire	Cellular	LED Faceplate Light	Beacon/Strobe	Area Light	AED	Audio Paging	Dual Faceplates

Key Features

This CB4-sd is a **dual-opening** unit for the addition of a second speakerphone, directory faceplate, or custom faceplate.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

Key Features

The **access door** of the CB4-u model gives this unit additional space for IoT devices and batteries.

Best Application

- Use with **Nightcharge** for switch-grid parking lots. The phone charges at night while the power grid is on, and runs on battery during the day while it's off.

NightCharge Kit

Alternative backup battery power for switch-grid parking lots.

Part # **45006**

CB6 & SPEAKER PHONES

In The Wall

Key Features

The smallest Code Blue enclosure, the CB6 allows the following faceplate enclosure phones to be mounted flush with the wall, or on the wall's surface:

- **IA4100** Analog Speakerphone
- **LS1000** IP Speakerphone
- **LS2000** IP Handset Phone

The phone gains a small footprint look without sacrificing its robust capability.

The CB6-s shines in its ability to receive a cellular connection over a cellular IP antenna.

Key Features

Our smallest speakerphone, the bezel text on this single-button help phone can read “Emergency” or “Push for Help”.

Best Application

Wall-mounted in a stairwell for an AOR solution.

Key Features

With enhanced audio quality, this help phone comes as a single or double button with “Emergency” or “Push for Help” bezel text.

Best Application

Wall-mounted in a stairwell for an AOR solution.

Key Features

Centry is our smallest Help Point® phone. Featuring ringlit piezo buttons, curved blue beacon light, and camera option.

Best Application

Wall-mounted at door entrances or pool decks, and hallways for pedestrian & staff use.

FACEPLATE OPTIONS

For Enclosure Openings

What kind of help do you want to provide *at the touch of a button*?

Your Help Point® can connect your patrons to any number of resources, people or professionals.

With an engineering and telephony team at your fingertips, freely push the limits of how you can help in the name of emergency, security, assistance, and mobility.

Directory Faceplate

Stainless Steel faceplate frame for a printed media such as a directory or flyer.

Part # **40057**

CUSTOM Faceplate Cut-Out

Integrate additional bezel buttons, a third-party camera, card reader, or other technology into our blank plates with a our faceplate cut-out option.

BLUE ALERT[®]

Software

The new generation of Blue Alert[®] is here.

Blue Alert[®] is still sending and receiving alerts. But, it has taken legacy connection and monitoring capabilities to the next level by providing more features, functionality, and platform delivery options.

BLUE ALERT CONNECT

PBX Solution

Where do you need to send your calls? Whether it is 911, a dispatcher's desk, a professional call center or even a mobile device, you can configure your Blue Alert[®] Connect to send calls from any unit to the number of your choice.

Dial Tone

Conveniently generate dial tone for your Help Point[®] speakerphones.

IP and Analog

Bring IP and Analog technology together for seamless and flexible communication.

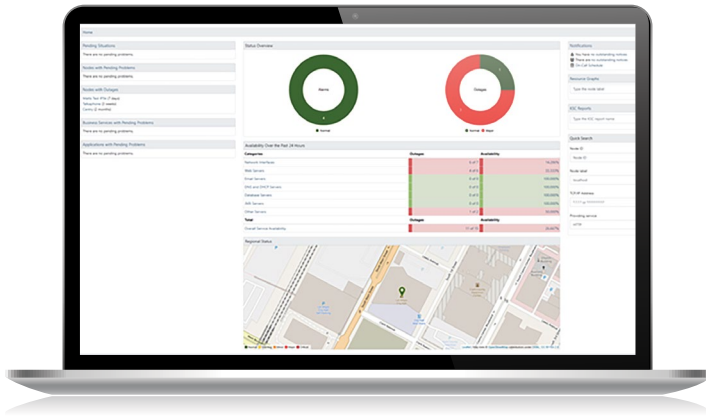

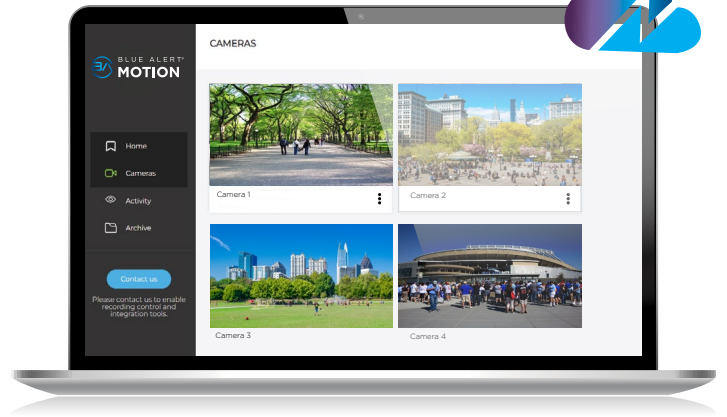

Paging

Easily set up emergency paging notifications.

Available Formats		CONNECT	MONITOR	MOTION
Off-Prem	 Nebula [™] Cloud Network	●	●	●
On-Prem	 ToolVox XS [™] Server	●	●	
	 ToolVox XV [™] Virtual Machine	●	●	

*ToolVox **XS** is a hardware appliance that deploys our Blue Alert software and enables connections to various platforms.*

*ToolVox **XV** is a virtual machine that allows the use of existing network hardware as the central hub without additional server installations.*

BLUE ALERT
MOTION

Video Feed and Storage

A secure hosted event-based video recording solution built on world leading streaming and storage technologies.

Cloud-based Recording

With cloud-based recording, you will never miss a moment. Blue Alert® Motion service automatically stores all your Help Point® initiated footage safely in the cloud, making it accessible from anywhere.

Notifications

Be notified via email or text when your Blue Alert® Motion platform logs a new recording. Receive alerts on your smartphone or other devices.

Mobile App

Easily access your event-based video recordings from anywhere with an internet connection.

BLUE ALERT
MONITOR

System Diagnostics & Monitoring

Get reassurance that your Help Points® are working, and the benefit of taking timely action when they're not.

Monitor

Continuous remote monitoring allows you to know when your Help Point® requires maintenance.

Diagnostics

Schedule and run tests to ensure all your Help Point® features are working properly.

Notifications

Receive notifications when diagnostics fails.

Are you currently operating with our **Legacy Toolvox X3 software** and interested in upgrading? Make the switch and enjoy enhanced performance and better user experience.

Call our team and take advantage of our upgrade promotion!

NETWORK

Over

nebula

Your Managed Cloud Platform

Run calls, video, data, and more on a *secure* VPN.

Problem

When your organization is preparing to onboard our Help Point® products and solutions, one of the biggest concerns can be your network security: **How can you know for sure what network security risks these Help Point® phones might bring?**

Solution

Being in the security industry - we get it. That's why we've added Nebula™ cloud to our end-to-end solution: **It's a network off your network.**

Calls, video, software and data - along with anything else you want - can be moved to a separate Nebula™ network for ultimate peace of mind.

NEW

Failover Connectivity Solution

Code Blue offers a multicarrier sim card solution for failover backup. Our sim card will roam between major network carriers for continuous cellular connection. **For more information, please contact us at 800-205-7186.**

Enables...

- ✓ **Cloud-Hosted PBX**
Blue Alert® Connect over our cloud network.
- ✓ **Cellular SIM Cards**
Now offering 4G/5G cellular data plans and multicarrier sim cards.
- ✓ **Network Security**
A secure VPN connection off your network.
- ✓ **Redundant Connectivity**
Primary and failover communications. **Ask about our back up cellular sim card!**
- ✓ **Quick-Fix for Cabling Issues**
Avoid trenching costs and leave cable behind.
- ✓ **Multiple Connection Options**
Wired, Wi-Fi, or cellular connection.
- ✓ **Automatic Updates**
A fully-managed cloud platform.
- ✓ **Drop Network Maintenance**
Unless maintenance is something you actually *want* to do; Managed and Consumer packages are available.

Network Packages

Blue Alert® software provides the *call* connection - SIP registration, call routing, connection supervision, SNMP diagnostics and reporting.

In packages based on your organization's network preferences, management style and size, we seek to provide the scenario that's ideal for you.

Managed and **Consumer** Cloud packages provide a remote Nebula™ cloud network for storing Blue Alert® software - and more - off your local network. **Private** Cloud keeps Blue Alert® software on your own local network via server appliance or VM.

Flexible Network Connectivity Options

We can help you maintain the flexibility to place devices where phone or data lines may not be available or we can work with your existing infrastructure to make sure you stay connected.

CUSTOMIZE AN EXPECTANT

The Visual Psychology of Help

Blue light beacon phones have historically symbolized emergency help. With additional creativity your Help Point® can help in other ways.

Your brand colors and logo not only symbolize your ownership of the blue light phone, they also establish trust and familiarity with it, increasing the likelihood of its use for more than just emergency situations.

The presence of your brand can challenge their assumption that it only calls 9-1-1 or security. This opens more doors of curiosity, causing them to ask:

- “When can I use this?”
- “Who might this call?” or
- “What might this help me do?”

It’s important to answer those questions as quickly as possible through the color, text and graphic elements of your Help Point® design.

Recommended Combinations

Will your Help Point® ...

Color

Deter Crime, Call 9-1-1 Only?	Blue or Local Law Enforcement Brand Colors
Call campus safety or grounds security?	Brand Colors
Provide Life Rescue Resources?	Red and White and/or Brand Colors
Reach a Suicide Hotline?	Yellow
Facilitate Gate/Door Entry?	Brand Colors
Alert for Handicap Assistance?	Brand Colors
Provide a Safe Exchange Zone?	Brand Colors
Offer Parking Garage Assistance?	Stainless Steel or Brand Colors
Provide a Courtesy Phone?	Stainless Steel or Brand Colors

ION

Assistance, Help Point	Assistance, Push for Help and/or custom	Handicap symbol and brand logo
Exchange Zone	Assistance and/or custom	Exchange symbol and brand logo
Assistance, Courtesy, Help Point	Assistance or 911	None or brand logo
Courtesy, Information	Assistance	None or brand logo

Did you know our clearcoat paint option increases the corrosion resistance of your Help Point® and **increases your Warranty?**

Side Text

The large reflective text labeling the side of your Help Point® should be used to tell them **who's** help or what kind of help they will be getting connected to.

Bezel Text

The text on the call button's bezel further confirms or differentiates the type of call they can make. Models with multiple faceplate openings give way to several bezel text opportunities.

Paint Process

Our intensive multi-coat paint process begins with a one-component organic zinc rich primer that provides excellent corrosion resistance and is finished with topcoat baked-on polyurethane enamel for maximum durability and longevity.

Choose from our library of standard colors, or have us color-match your exact brand colors in Pantone or RAL.

Graphics

Add vinyl and silkscreen graphics of your logo and other design details to customize your Help Point®.

DEVELOP YOUR SOLUTION

Cloud-Based AOR

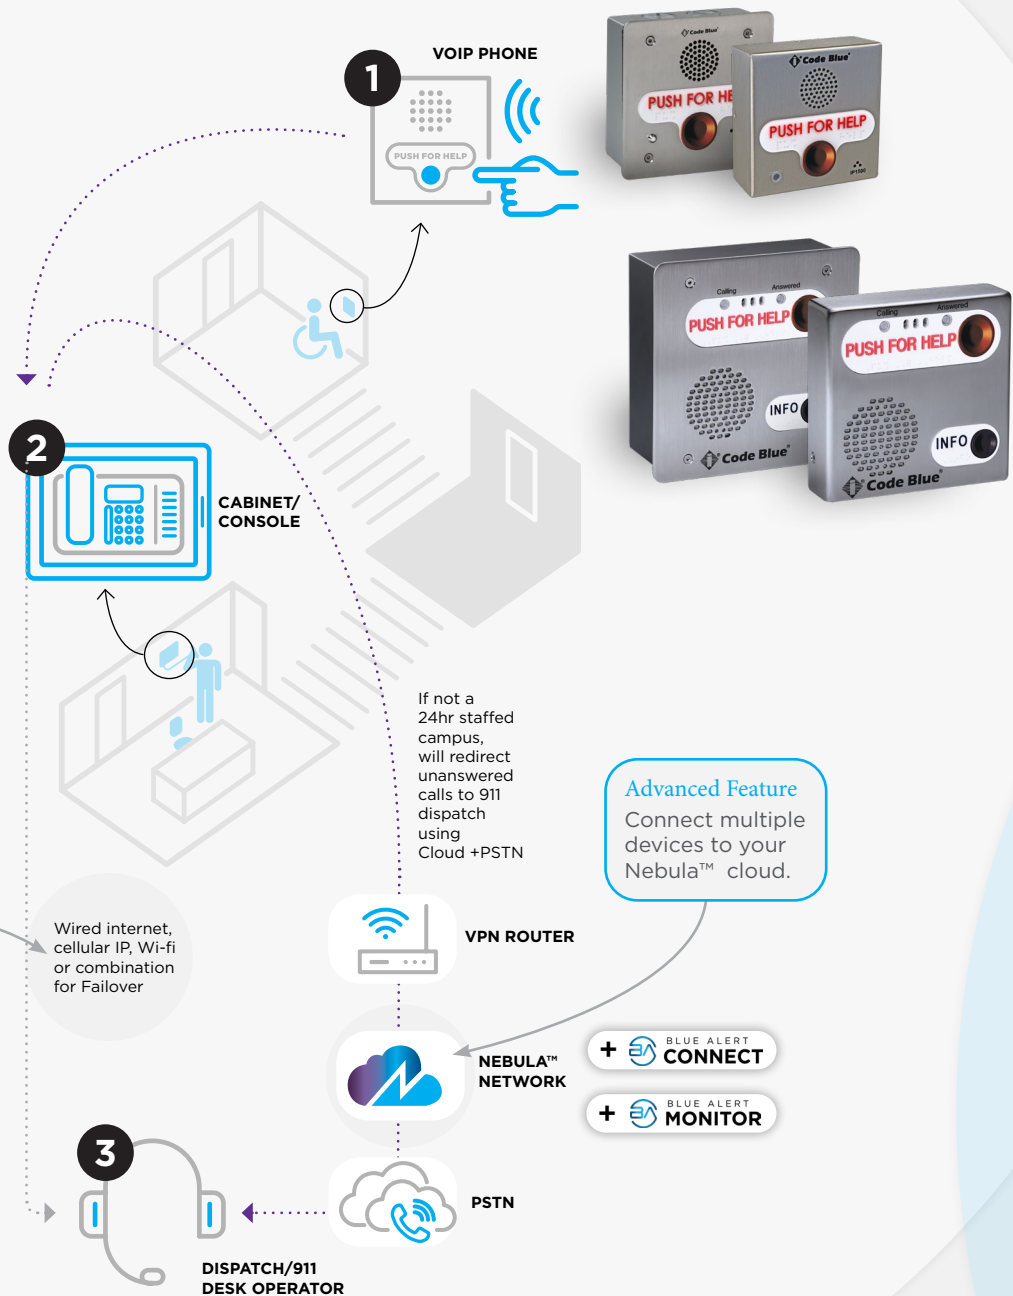

Cloud-based Blue Alert® Connect and Blue Alert® Monitor can be utilized with IP- and analog-based Area of Refuge* solutions.

An AOR system provides building stairwells with reliable two-way communication, allowing first responders to assist individuals who cannot evacuate or may require additional assistance.

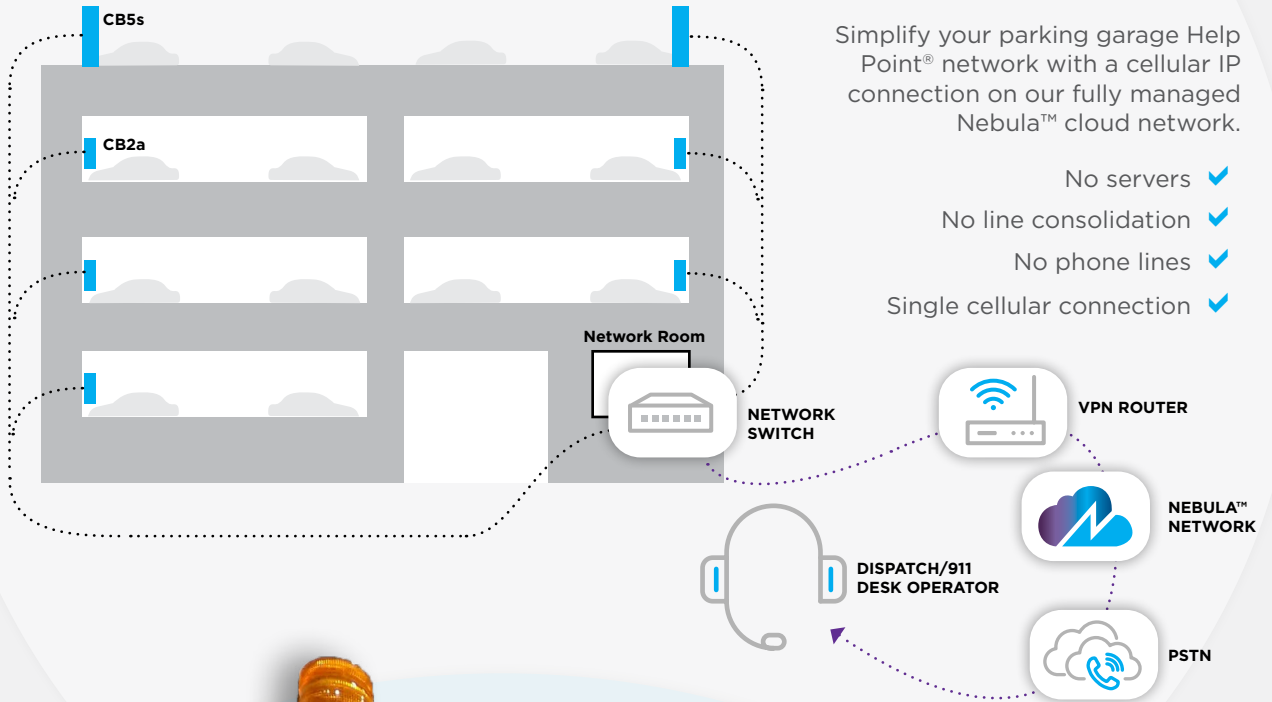

**sometimes called Area of Rescue*

Advanced Feature
Internet redundant connection for Failover.

Garage Phone Network

Transit Boarding Assistance

Wheelchair-height boarding assistance buttons initiate an amber strobe, alerting the conductor to stop and offer assistance to a disabled patron boarding the train.

A double button speakerphone with camera (LS1000-dc) provides an INFO button to hear the train schedule and a PUSH FOR HELP call button to reach an operator via cellular IP connection on a fully-managed Nebula™ cloud network.

The camera sends video feed to the operator's Blue Alert® Motion app for superior visibility and communication as they assist.
