Code Blue Speakerphones

From our small footprint phones, to our Help Point® faceplate phones, our proprietary speakerphone designs mean business.

Page 22 **NEW**

Re-Introducing Blue Alert® Software

Out with the old, in with the new generation of our Blue Alert® System Management software.

Page 24 **NEW**

Nebula™ Network

Nevermind adding us (or other third party devices) to your network: set up your entire Help Point® system on an un-hackable remote private network. Introducing Code Blue's *managed* cloud platform: Nebula™.

Page 26-29

Build End-to-End Solutions

It's not just a Blue Light phone anymore. See three examples of how Code Blue can help people raise their standard of care on their property.

Purpose for a Help Point®

More than just a call box.

Increase your Presence

Whether you aim to deter or detect suspicious/criminal activity, or you want to be present to assist your patrons. Customizing your Help Points can help you provide the presence that fits your need.

Improve your Response

Whether it is an accident, fire, natural disaster, or someone in need of information or assistance, Code Blue products are designed to empower your personnel to gather information and facilitate a quick & intelligent response.

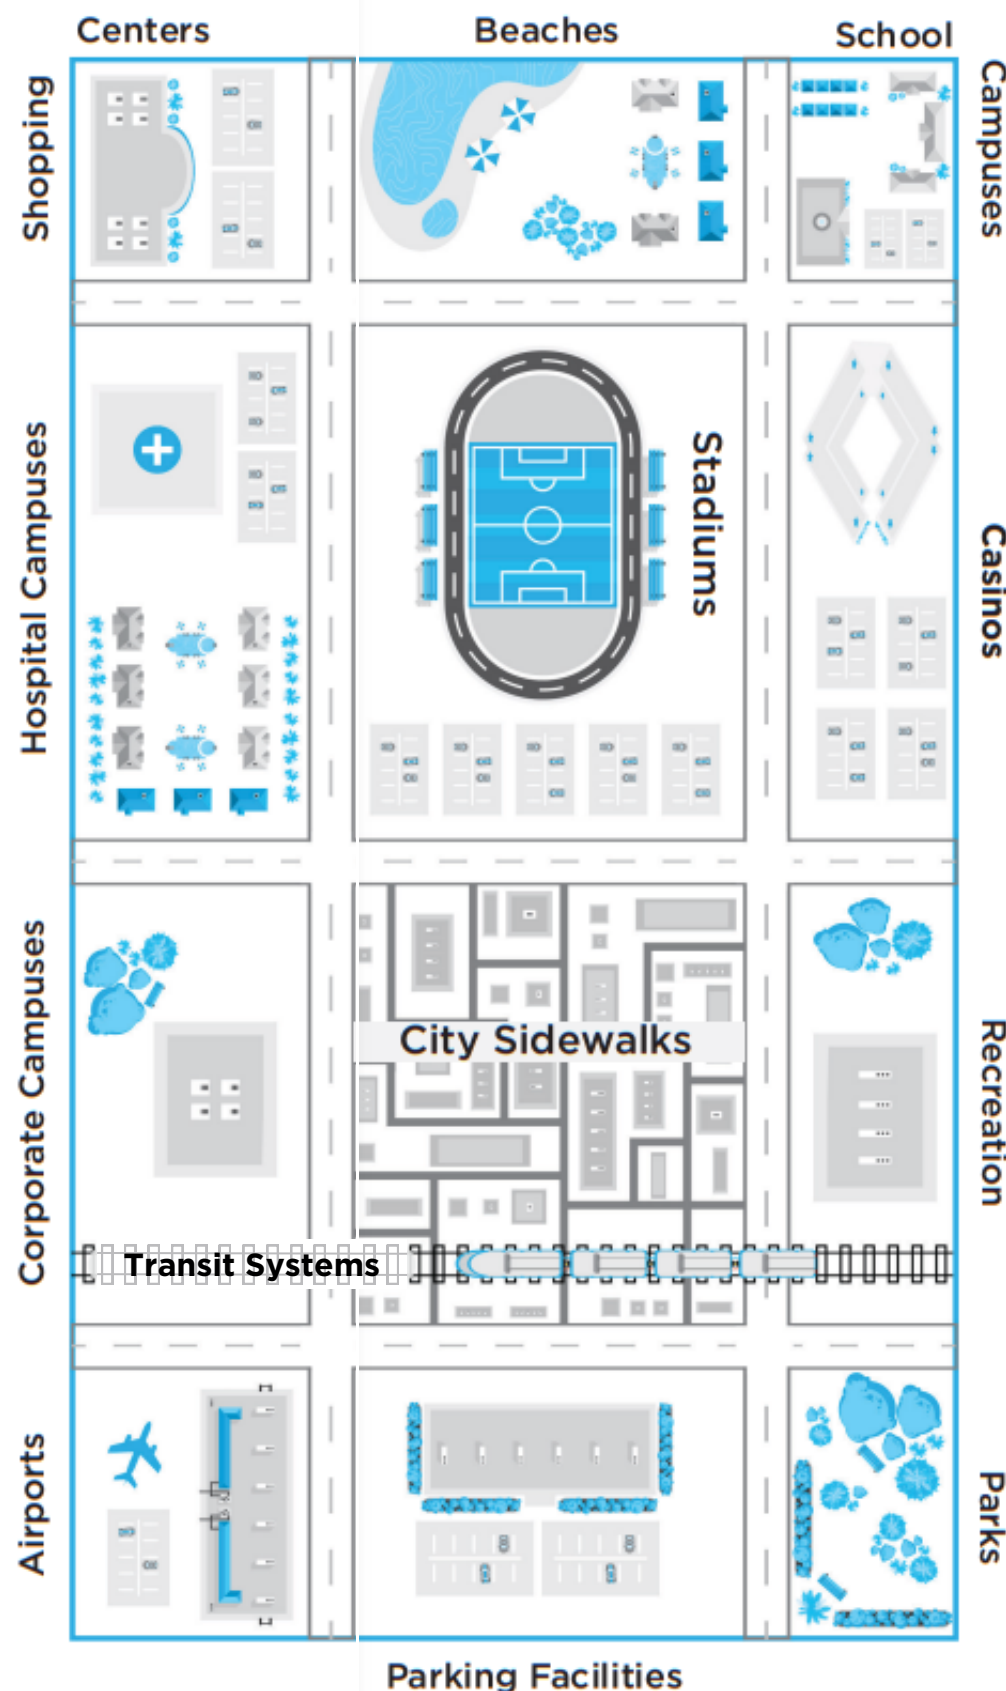

Promote your Brand

With customized colors & graphics, you can promote your brand and show your willingness to provide "Help at the touch of a button".

Enhance your Customer Service

A personal emergency such as a flat tire, a car that won't start, a malfunctioning gate or ticket machine, quickly & effectively resolved, reflects positively on your brand & customer service ratings.

Where do you Help Point®?

Places with

- **Parking:** Lots, decks, and garages.
- **Walkways:** Concourses, sidewalks, trails, hallways, open spaces, bridges, tunnels.
- **Entrances:** Guarded or Unmanned.

Such as...

Hospitals

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage

Schools

- CB1 on sidewalks and trails
- CB4 pole-mounted or CB5s in parking lot

Transit Systems

- CB1 on platforms or at bus stops shelters
- CB2 on underground platform walls
- CB4 call boxes on platforms and in parking lots

Airports

- CB2 wall-mounted in parking garage or overpass
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage
- CB6 or Centry® in concourse and skyways

Corporations

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB4 curb-mounted or CB9 at gated entrance

Cities

- CB1 on sidewalks
- CB2 on bridges and in tunnels
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage

Beaches

- CB1 on beach, pier and/or boardwalk
- CB4 pole-mounted or CB5s in parking lot
- Centry on pavilion walls

Shopping Centers

- CB1 on sidewalks
- CB2 wall-mounted in parking garage
- CB4 pole-mounted or CB5s in parking lot
- CB5p on parking deck or top deck of garage
- Centry in restroom hallways and food court

Stadiums

- CB1 at stadium entrances
- CB4 pole-mounted or CB5s in parking lot
- CB6 or Centry® in perimeter concourse

Casinos

- CB4 pole-mounted or CB5s in parking lot
- CB5p in parking deck or top deck of garage

Parks & Recreation

- CB1 on trails

CONFIGURING HELP POINTS®

As simple - or as robust - as you need it to be.

1

Map the locations of the Help Points®.

As a rule of thumb, 1 or 2 blue lights should be visible from any location on site.

2

Choose how the enclosure will be mounted and the enclosure model/series.

Free Standing Series/Models

- + **CB1** CB1e, CB1s, CB1w (pg. 8)
- + **CB5** CB5p, CB5s (pg. 10)
- + **CB9** CB9s, CB9t (pg. 12)
- + **CBRT** (pg. 13)

Wall or Pole-Mounted Series

- + **CB2** CB2a, CB2e, CB2s (pg. 14)
- + **CB4** CB4r, CB4s, CB4u (pg. 16)
- + **CB6** CB6 and Speakerphones (pg. 18)

(Consider power options* and property voltage availability.)

3

Select a Faceplate & Phone. (pgs. 20-21)

Customize your faceplate and phone with analog or IP, additional buttons, keypads and more.

4

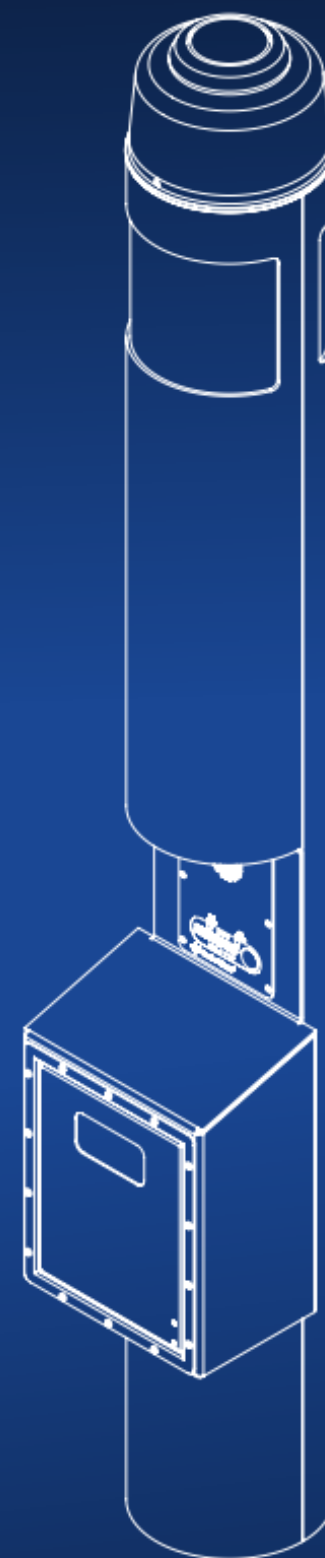

Choose your Communication Platform. (pgs. 24-25)

Network management, maintenance and monitoring options.

5

Utilize our Blue Alert® System Management Tools. (pg. 22-23)

Elevate your standard of care with our advanced connection and monitoring capabilities.

From Concept to Construction

A wide variety of tools are available online to aid your design process at codeblue.com/design.

Emergency and Concierge

Strengthening Security

Whether it's an accident, fire, natural disaster or something more sinister, the life-saving potential of emergency communication solutions cannot be overstated. That's why Code Blue products are designed to provide a lifeline to request help and empower you to act quickly and intelligently before, during and after an incident.

Enhancing Customer Service

A personal emergency – a car that won't start, a malfunctioning gate or ticket machine – may not be life-threatening, but it does highlight the opportunity to offer onsite assistance in situations that are not potentially dangerous and may not require traditional police or 911 personnel.

Key Features

The inset faceplate design allows for a faceplate light, making this model ideal for poorly lit areas. A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted or pole-mounted, in a hallway, parking garage, deck, or lot.

Key Features

An area light feature makes the CB2-s stand out in the dark. The faceplate light supports visibility of the speakerphone beneath the deep inset.

Best Application

Poorly lit parking lots or building entrances.

Key Features

A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted or pole-mounted in a well-lit parking deck, garage or hallway.

Key Features

This CB2 model offers a built-in paging speaker. A 4-inch depth makes this model ADA compliant.

Best Application

Wall-mounted in a well-lit parking deck or garage where an AP system is desired.

Key Features

This CB2 model features a temperature-controlled, waterproof housing to store and power an AED.

Best Application

AED compliance applications:

- Outside k-12 school entrances.
- On each level of a parking garage.

*CB2-AED Not Available in Stainless Steel

Mounting Kit Options

CB4-s and CB4-r Curb Mount Kits

Steel painted curb mount stands. Available in a single or dual for car height and/or truck height applications.

Part #	(Dual) 40777 (Single) 41462
--------	--

CB4 Pole Mount Kit

Mounting bracket with banding and fasteners.

Part #	40027
--------	--------------

Key Features

Similar in size to the surface-mount speakerphone enclosure, this model sets itself apart with the addition of a low-profile **canopy hood**.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

Key Features

This CB4-r model adds height to the hood for the addition of **faceplate light**. You can also customize the additional **front face graphic**.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

Key Features

This CB4-d is a **dual-opening** unit for the addition of a second speakerphone, directory faceplate, custom faceplate.

Best Application

- Mounted in a parking lot or garage.
- Curb-mounted at a shipping/receiving gate.

Key Features

The **access door** of the CB4-u model gives this unit additional space for IoT devices and batteries.

Best Application

- Use with **Nightcharge** for switch-grid parking lots. The phone charges at night while the power grid is on, and runs on battery during the day while it's off.

NightCharge Kit

Alternative backup battery power for switch-grid parking lots.

Part #	45006
--------	--------------

Remote Strobe **40525**

CB6 & SPEAKER PHONES

In The Wall

Key Features

The smallest Code Blue enclosure, the CB6 allows the following faceplate enclosure phones to be mounted flush with the wall, or on the wall's surface:

- **IA4100** Analog Speakerphone
- **LS1000** IP Speakerphone
- **LS2000** IP Handset Phone

The phone gains a small footprint look without sacrificing its robust capability.

The CB6-s shines in its ability to receive a cellular connection over a cellular IP antenna.

Key Features

Our smallest speakerphone, the bezel text on this single-button help phone can read "Emergency" or "Push for Help".

Best Application

Wall-mounted in a stairwell for an AOR solution.

Key Features

With better audio quality than the IP1500, this help phone comes as a single or double button with "Emergency" or "Push for Help" bezel text.

Best Application

Wall-mounted in a stairwell for an AOR solution.

Key Features

Centry is our smallest Help Point® phone. Featuring ringlit piezo buttons, curved blue beacon light, and camera option.

Best Application

Wall-mounted at door entrances or pool decks, and hallways for pedestrian & staff use.

RE-INTRODUCING...

BLUE ALERT®

Software

The new generation of Blue Alert® is here.

Blue Alert® is still sending and receiving alerts. But, it has taken legacy connection and monitoring capabilities to the next level by providing more features, functionality, and platform delivery options.

Available Formats		CONNECT	MONITOR	MOTION
Off-Prem	 Fusion Nebula™ Cloud Network	•	•	•
	 Fusion Server	•	•	
On-Prem	 Fusion Virtual Machine	•	•	

PBX Solution

Where do you need to send your calls? Whether it is 911, a dispatcher's desk, a professional call center or even a mobile device, you can provision your Blue Alert® Connect to send calls from any unit to the number of your choice.

Dial Tone

Conveniently generate dial tone for your Help Point® speakerphones.

IP and Analog

Bring IP and Analog technology together for seamless and flexible communication.

Paging

Easily set up emergency paging notifications.

System Diagnostics & Monitoring

Get reassurance that your Help Points® are working, and the benefit of taking timely action when they're not.

Monitor

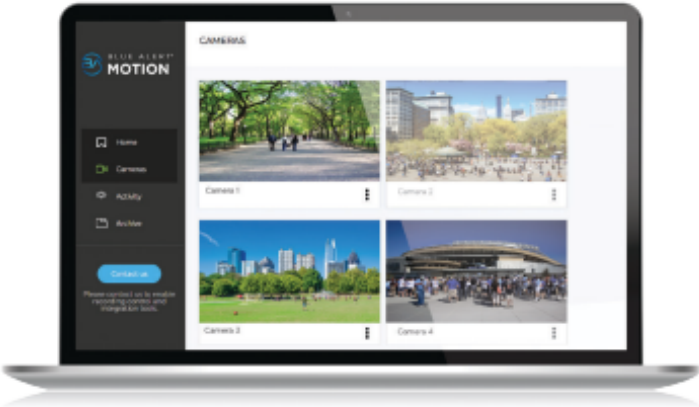

Continuous remote monitoring allows you to know when your Help Point® requires maintenance.

Diagnostics

Schedule and run tests to ensure all your Help Point® features are working properly.

Notifications

Receive notifications when diagnostics fails.

Video Feed and Storage

A secure hosted event-based video recording solution built on world leading streaming and storage technologies.

Cloud-based Recording

With cloud-based recording, you will never miss a moment. Blue Alert® Motion service automatically stores all your Help Point® initiated footage safely in the cloud, making it accessible from anywhere.

Notifications

Be notified via email or text when your Blue Alert® Motion platform logs a new recording. Receive alerts on your smartphone or other devices.

Mobile App

Easily access your event-based video recordings from anywhere with an internet connection.

Are you currently operating with our Legacy Toolvox X3 software and interested in making the switch? Take advantage of our upgrade promotion and call our team today.

NETWORK

Over

Nebula

Your Managed Cloud Platform

Run calls, video, data, and more on a *secure* VPN.

Problem

When your organization is preparing to onboard our Help Point® products and solutions, one of the biggest concerns can be your network security: *How can you know for sure what network security risks these Help Point® phones might bring?*

Solution

Being in the security industry - we get it. That's why we've added Fusion Nebula™ to our end-to-end solution: *It's a network off your network.* Calls, video, software and data - along with anything else you want - can be moved to a separate Nebula™ network for ultimate peace of mind.

NEW Multicarrier & Back up Sim Card

Code Blue offers a multicarrier sim card solution for *failover backup*. Our sim card will roam between major network carriers for continuous cellular connection. For more information, please contact us at 800-205-7186.

Enables...

- ✓ **Hosted PBX**
Blue Alert® Connect over our cloud network.
- ✓ **Cellular SIM Cards**
Now offering 4G/5G cellular data plans and multicarrier sim cards.
- ✓ **Network Security**
A secure VPN connection off your network.
- ✓ **Redundant Connectivity**
Primary and failover communications. **Ask about our back up cellular sim card!**
- ✓ **Quick-Fix for Cabling Issues**
Avoid trenching costs and leave cable behind.
- ✓ **Multiple Connection Options**
Wired, Wi-Fi, or cellular connection.
- ✓ **Automatic Updates**
A fully-managed cloud platform.
- ✓ **Drop Network Maintenance**
Unless maintenance is something you actually *want* to do; Private and Consumer packages are available.

Network Packages

Blue Alert® software provides the *call* connection - SIP registration, call routing, connection supervision, SNMP diagnostics and reporting - what *network connectivity* will it happen on?

In packages based on your organization's network preferences, management style and size, we seek to provide the scenario that's ideal for you.

Managed and **Consumer** Cloud packages provide a remote Fusion Nebula™ cloud network for storing Blue Alert® software - and more - off your local network. **Private** Cloud keeps Blue Alert® software on your own local network via server appliance or VM.

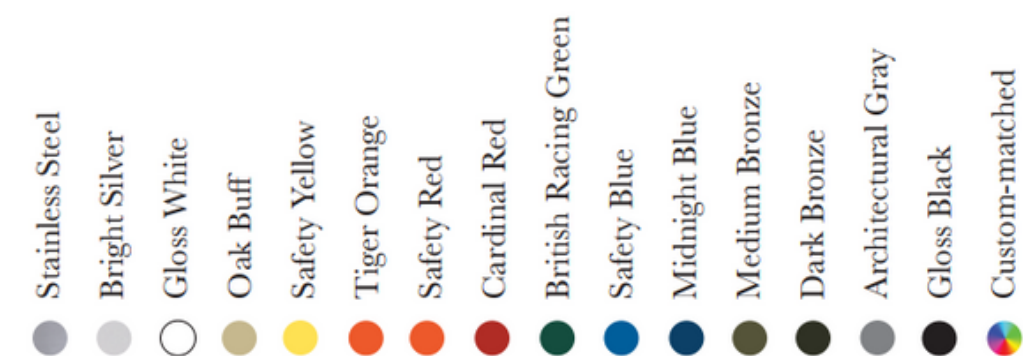

Flexible Network Connectivity Options

We can help you maintain the flexibility to place devices where phone or data lines may not be available or we can work with your existing infrastructure to make sure you stay connected.

CUSTOMIZE AN EXPECTATION

FINISH OPTIONS: *Clearcoat finish required for high iron or saltwater locations.

The Visual Psychology of Help

Blue light beacon phones have historically symbolized emergency help. With additional creativity your Help Point® can help in other ways.

Your brand colors and logo not only symbolize your ownership of the blue light phone, they also establish trust and familiarity with it, increasing the likelihood of its use for more than just emergency situations.

The presence of your brand can challenge their assumption that it only calls 9-1-1 or security. This opens more doors of curiosity, causing them to ask:

- “When can I use this?”
- “Who might this call?” or
- “What might this help me do?”

It’s important to answer those questions as quickly as possible through the color, text and graphic elements of your Help Point® design.

Recommended Combinations

Will your Help Point® ...	Color	Side Text	Bezel Text	Graphics
Deter Crime, Call 9-1-1 Only?	Blue or Local Law Enforcement Brand Colors	Emergency, Police	Emergency or Push for Help	None or local law enforcement logo
Call campus safety or grounds security?	Brand Colors	Security	Emergency, Push for Help or Assistance	Brand logo
Provide Life Rescue Resources?	Red and White and/or Brand Colors	Emergency, Help Point	Emergency or Push for Help	Red Cross and or brand logo
Reach a Suicide Hotline?	Yellow	Crisis Hotline, Help Point	Push for Help or handset phone	Hotline logo and/or brand logo
Facilitate Gate/Door Entry?	Brand Colors	Access, Entry	Assistance or Push for Help	Brand logo
Alert for Handicap Assistance?	Brand Colors	Assistance, Help Point	Assistance, Push for Help and/or custom	Handicap symbol and brand logo
Provide a Safe Exchange Zone?	Brand Colors	Exchange Zone	Assistance and/or custom	Exchange symbol and brand logo
Offer Parking Garage Assistance?	Stainless Steel or Brand Colors	Assistance, Courtesy, Help Point	Assistance or 911	None or brand logo
Provide a Courtesy Phone?	Stainless Steel or Brand Colors	Courtesy, Information	Assistance	None or brand logo

Did you know our clearcoat paint option increases the corrosion resistance of your Help Point® and **increases your Warranty?**

Side Text

The large reflective text labeling the side of your Help Point® should be used to tell them **who's help** or what kind of help they will be getting connected to.

Bezel Text

The text on the call button's bezel further confirms or differentiates the type of call they can make. Models with multiple faceplate openings give way to several bezel text opportunities.

Paint Process

Our intensive multi-coat paint process begins with a one-component organic zinc rich primer that provides excellent corrosion resistance and is finished with topcoat baked-on polyurethane enamel for maximum durability and longevity.

Choose from our library of standard colors, or have us color-match your exact brand colors in Pantone or RAL.

Graphics

Add vinyl and silkscreen graphics of your logo and other design details to customize your Help Point®.

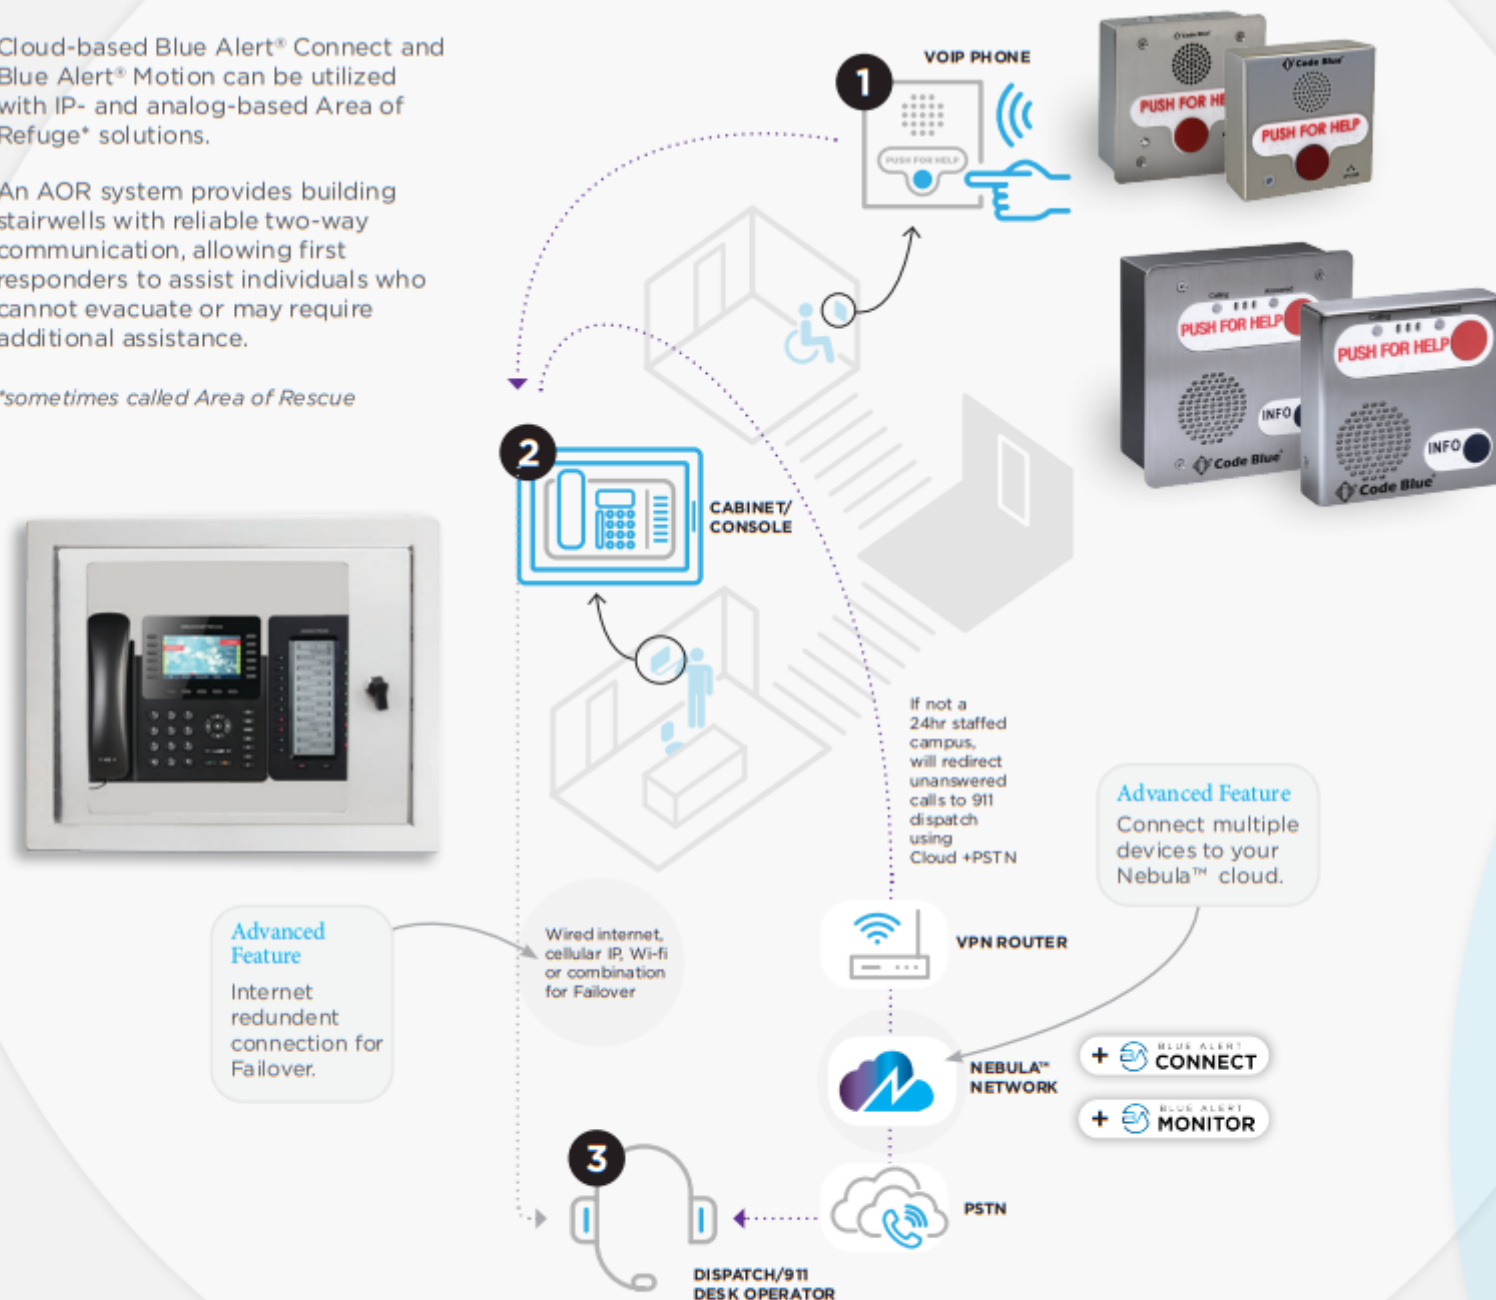

DEVELOP YOUR SOLUTION

Cloud-Based AOR

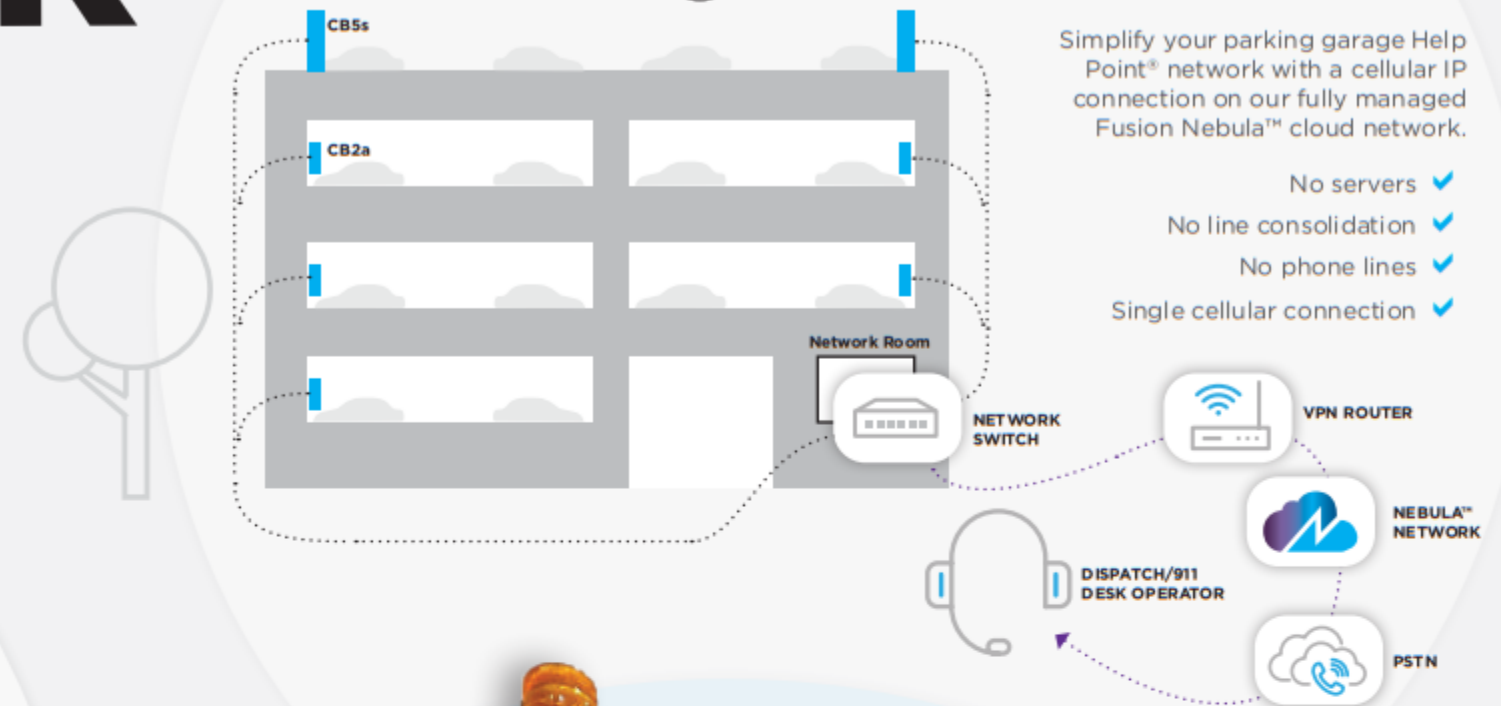

Cloud-based Blue Alert® Connect and Blue Alert® Motion can be utilized with IP- and analog-based Area of Refuge® solutions.

An AOR system provides building stairwells with reliable two-way communication, allowing first responders to assist individuals who cannot evacuate or may require additional assistance.

**sometimes called Area of Rescue*

Garage Phone Network

Transit Boarding Assistance

Wheelchair-height boarding assistance buttons initiate an amber strobe, alerting the conductor to stop and offer assistance to a disabled patron boarding the train.

A double button speakerphone with camera (LS1000-dc) provides an INFO button to hear the train schedule and a PUSH FOR HELP call button to reach an operator via cellular IP connection on a fully-managed Fusion Nebula™ cloud network.

The camera sends video feed to the operator's Blue Alert® Motion app for superior visibility and communication as they assist.

How Important is a UL Certification?

A UL certification means Code Blue has put their products through various testings to ensure it meets UL's high level of standard for performance, durability, and safety. This assures that our products will function as described, are safe, and is made of high-quality materials.

NOTE:
UL Model Numbers are in reference to the UL Certification **ONLY**.
For accurate configuration of your design requirements, please contact us for assistance in identifying actual part numbers.
