

Code Blue Help Points® have endured tornadoes, floods and scores of natural and man-made disasters. Through it all, they protect those in harm's way thanks to their sturdy design and unmistakable craftsmanship.

Code Blue also offers a clear coating process that will reinforce the longevity of the products at your location, helping enclosures and phones look like new even when they are subjected to the harshest elements, particularly areas exposed to salt water.

Code Blue products are placed in all kinds of different environments. Through our clear coating process, we can ensure that additional measures are available to enhance our products out in the field, making them even more durable and resistant to corrosion.

Advantages

- Added durability.
- Extra resistance to corrosive elements.
- Minimizes fading caused by time and environment.
- Quicker & easier maintenance.

Locations

- Saltwater Environments
- Bridges
- High Wind Zones
- Tunnels and Subways

Additional Warranty

- Painted Help Points® **without** a clear coat finish have a 5 year warranty on the paint.
- Painted Help Points® **with** a clear coat finish have an additional 2 years added to the warranty, for a total of 7 years of coverage on the finish.

IMPORTANT NOTE: Clear Coat Finishes are only available for painted surfaces. Clear coat cannot be applied directly over stainless steel. For products that have an exposed stainless steel finish & also require a clear coat for corrosion resistance, it is recommended to utilize a combination of our Bright Silver wet-coat paint with a clear coat over it.
