

LEVERAGE THE POWER OF CELLULAR IP

Dependable Network Communication

Using Cellular IP communications to connect security and service devices is a great alternative to wired networks. Whether phone lines or network connections are not available, trenching costs are prohibitive, or a project needs to be up and running swiftly, using cellular networks as the communication pathway is a quick way to connect remote IP devices.

System Components

Benefits

- » Ease of Installation
- » Installation & location flexibility
- » Scalability to grow
- » Managed cloud platform and services
- » Connection & performance monitoring
- » Ability to connect multiple locations to a centralized system
- » Ruggedized equipment for harsh environment
- » Supports voice, video, and other IP devices

Features

- » Supports 4G LTE and 5G connectivity; redundant connections available
- » Cloud-based voice calling and video storage
- » Cloud management, diagnostic monitoring and reporting
- » DID/e911 support
- » Reliable, secure connections
- » Connect multiple devices using a single router

Target Applications

- » Parking lots and garages
- » Building & Gate entries
- » Common areas/walkways
- » Remote, unmanned locations
- » Parks, recreation facilities and beaches
- » Transit depots
- » Campus environments
- » Many more...
