Is your organization's approach to safety and security evolving as fast as the risks you face?
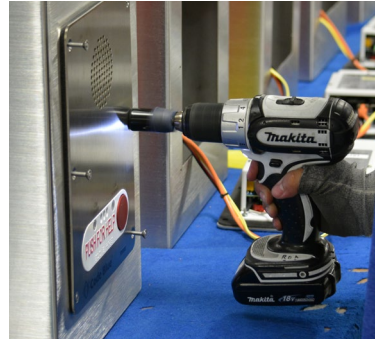

Many campuses struggle to balance safety, risk management, and budget efficiency. Emergency blue light phones remain a critical part of a layered security approach, ensuring anyone can access help instantly.

Emergency

PUSH FOR HELP
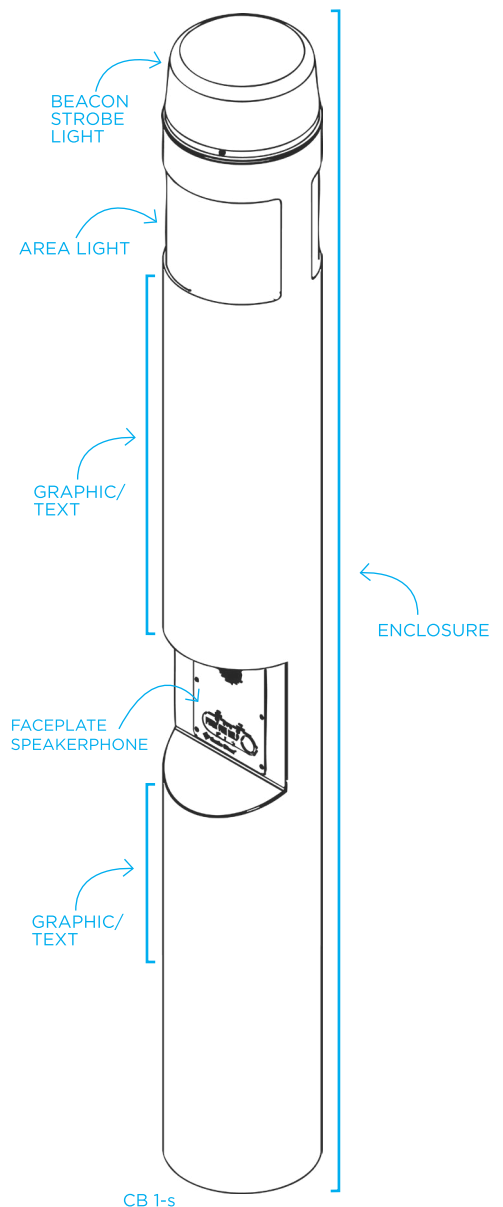

Code Blue

Why the Code Blue Community Chooses Us

Located in Holland, Michigan, Code Blue is an industry pioneer in emergency communication solutions, handcrafting reliable and accessible products that provide assistance when it matters most. From our iconic blue light phone pedestals to our latest cloud-based solutions, we deliver durable and highly visible security solutions that offer help at the touch of a button. Our end-to-end system supports first responders before, during, and after an incident with advanced alerting, managing, and responding technology.

We tailor our solutions to meet unique needs, from network and power connections to seamless industry integrations. Our open approach fosters collaboration, delivering the best outcomes for end-users. With expert consultation, durable designs, and crime-deterrent features, our products go beyond communication—enhancing safety, enabling incident reporting, and improving emergency response.

Are you leveraging data and diagnostics to improve safety and decision-making?

Security is at the core of our products, combining human expertise with real-time diagnostics that AI can't replace. Choose Code Blue for smarter solutions that truly care

LS1000, LS2000, IA4100

**Available with various buttons, keypads, camera combinations.**

Emergency Management
Software

Blue Alert®, is designed to enhance the functionality and reliability of your Help Points® while providing your security team with powerful tools for communication, visibility, and diagnostics. Once known for simply sending and receiving alerts, Blue Alert® has evolved into an essential tool for any public safety ecosystem.

Code Blue's Blue Alert software solutions simplify safety with smarter, more efficient technology.

- **CONNECT** for generating dial tones
- **MONITOR** for system diagnostics
- **MOTION** for event-based video recording
- **PORTAL** to manage your Help Point® ecosystem
- **INTERCONNECT** to connect non-Code Blue communication devices to Code Blue's call management system.
