

## Product Description

Based on the award-winning emergency management platform, the **VM ToolVox®** is a virtual appliance that can be easily installed on a virtual machine environment, such as VMware or VirtualBox, providing you with administration software that offers unique real-time monitoring and provisioning options, effectively acting as a hub for connecting devices.

## Standard Features

Schedule and run tests of connected IP and analog devices to ensure the speakers, buttons and microphones are working properly at all times.

Remotely monitor and provision phones and public address speakers.

Generate dial tone for your emergency phones.

House Code Blue software.

## Popular Upgrades

messaging platforms at the touch of a button.

### Blue Alert® MNS:

A sophisticated software solution that provides emergency notifications over audio, visual and

communication devices, while the system securely archives the incident data for future reference.

### Blue Alert® EMS:

Handle all incoming events effectively by remotely controlling emergency

## Benefits

- No hardware to maintain or store
- Utilize existing virtual machine environment features and benefits
- Operates the same as the hardware-based ToolVox platform
- Easy installation via OVA file delivered via an FTP link

# Technical Features
