

Product Description

A **4G LTE Cellular IP** option is available for areas where phone lines are not available or trenching costs are prohibitive, and can route incoming and outgoing calls through a 4G LTE wireless network using SIP (Session Initiation Protocol) paired with our Managed Cloud and/or Private Cloud services. Check with your service providers to confirm 4G LTE service availability.

NOTE: Compatible with most major cellular service providers, including Verizon, T-Mobile, Sprint, AT&T, Rogers, Telus, Bell, and U.S. Cellular. Additional providers may be available. Check wirelessadvisor.com for listings in your area.

Standard Features

- ✓ Ruggedized 4G LTE router
- ✓ Cellular, Ethernet and Wi-Fi automatic failover capabilities
- ✓ Redundant SIM slots for multiple carriers
- ✓ Cellular and GPS antennas
- ✓ Terminal block for secure power supply
